

This image shows a Kodak Color Control Patches chart, a standard tool for color calibration in photography. The chart includes a ruler at the top with markings in both inches (0 to 4) and centimeters (0 to 10). Below the ruler is a row of 19 numbered color patches, each with a corresponding color label: 1 Blue, 2 Cyan, 3 Green, 4 Yellow, 5 Red, 6 Magenta, 7 White, 8 3/Color, 9 Black, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19. The patches are arranged in a grid format, with the first row containing patches 1 through 19, and the second row containing patches 20 through 38. The chart is used to ensure color accuracy and consistency in digital imaging.
