

A letter of complaint from Water Affairs, of 18-11-94 was received by the project asking why only one person was sent for the course instead of 2 names as per letter from GSDP Administratián.

After studying the above issue the committee got very concerned because young man lost his chance of receiving training which is regretable since the project policy is to seriously move into staff development. It was strongly emphasised that in future such a thing should not happen.

The Water Programme Officer should exculpate himself verbally and writing to the Coordinator following the trend of events.
